

Being MED-READY Can Save Your Life

The **MED-READY I.D. Emergency Data Card** or **Key Chain** is a plastic wallet card or plastic key chain containing your personal medical data. In case of emergency, the card or key chain is easily read by others without being magnified. Any medical data that might help a doctor act faster should be on your card, such as drug allergies, diabetes, heart trouble, hypertension and other conditions. If you are ill or in an accident, it's all there...no phone numbers to call as with I.D. bracelets. Emergency care begins at once to...

...**Save Your Life.**

If you have no health problems, the I.D. card in an emergency, lets medics know, so that treatment begins without delay.

There are two types of **MED-READY I.D.'s** available. The first is a laminated card that can be carried in a wallet. The other is a 3 x 2 Key Chain, perfect for joggers, children or anyone who doesn't carry a wallet, which can be attached to your clothing, via a zipper or belt loop, or used to keep your keys on.
